Placement Catalogue 2010-2011 | PGDM - Financial Markets (AICTE approved)

CRISIL Business School Grading

CRISIL assigned grade A* (in Maharashtra) & A (National level) to Post Graduate Diploma in Management- Financial Markets (PGDM:FM) course offered by ITM- Navi Mumbai.

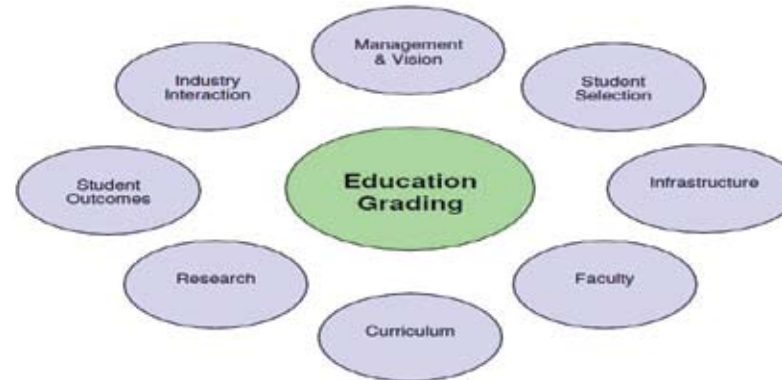

While grading following observations were made:

- Experienced Management & Reputed governing council.
- Good Feedback about Student quality from Recruiters.
- Course curriculum facilitates International Certification in Finance.
- Simulation Lab for trading in live-market environment.
- Adequate Library & Auxiliary infrastructure facilities.
- Core-finance programme with flexibility in course curriculum review.

CRISIL has developed a framework for the assessment and grading of programmes (courses) offered by business schools. The CRISIL grading reflects the relative ability of the graded business school to impart quality education and achieve desired student outcomes. The grading will be assigned on a seven-point scale at the national and state levels.

The parameters that CRISIL considers for grading Business Schools:

- Governance and Vision.
- Student Selection.
- Infrastructure.
- Faculty.
- Curriculum.
- Research.
- Student Outcomes.
- Industry Interface.

Why CRISIL?

Here are the key reasons why we chose CRISIL; we believe they are best suited to undertake this assignment. India's leading rating, research, risk and policy advisory company: CRISIL leads the market in depth of analysis and sophistication of approach.

A grading from CRISIL is a stamp of quality from the most renowned rating agency in India. Association with Standard & Poor's: CRISIL's majority shareholder is Standard & Poor's, the world's foremost provider of independent credit ratings, indices, risk evaluation, and investment research and data. Value-driven approach: All CRISIL businesses operate on the core values of analytical rigour, independence, integrity, innovation, and commitment.

Since 1987, CRISIL Ratings has developed rating and grading frameworks for hitherto unexplored segments such as small and medium enterprises, microfinance institutions, corporate governance and maritime education.

Dear Friends,

Greetings from the ITM Institute of Financial Markets.

Financial Markets are rapidly changing the business world in ways that nobody anticipated a decade ago. There are new markets, products and services which have changed the economic landscape of the world as a whole and India in particular. To truly stand out in this time of extra ordinary developments in the market place, the impact of which is compounded by the leveling forces of globalisation, a professional who is working in Financial Markets must be ready to react, adapt, improvise and innovate at a faster pace than ever before.

As educators, the ITM Institute of Financial Markets (ITM-IFM) prepares our post graduate students for the future by providing them with critical skills for the 21st century that will allow them to meet the unknown head-on and excel. For this, students are made to understand more than business concepts.

In the process students are taught how to develop adaptable strategies, how to think creatively and how to apply those skills to any situation that may arise in the new business landscape as the interacting forces of technology and globalisation affect the work place, the market place, new products and new services.

ITM-IFM has equipped the students with thinking and processing tools that will allow them to adapt to the world when it turns out to be different than what everybody thought. As a result our students will be in the game, not left scratching their heads doing things the “old” way, rather they will be innovating and leading.

With the academic rigour, our students are prepared to adapt and innovate as business evolves and they are the choice for meeting the talent shortage in the Financial Markets.

About ITM Group of Institutions

Any serious effort in management education is characterized by a unique duality-constant, unrelenting change supported by unwavering fundamentals. At Institute for Technology and Management, this duality is evidenced on the one side - by the sheer pace of operational growth and infra-structural expansion, the constant re-invention of academic offerings, and on the other side- by the commitment, honor and endurance of that group of individuals who make up the ITM Family.

In September 1991, ITM was founded by Dr. P. V. Ramana, with a singular objective- to prove the idea that a fully private, unaided Business School could survive and thrive in the exclusive world of Management Education in India. 18 years on, the ITM Group of Institutions enjoys the approval and patronage of the Indian Industry, Academicians and the thousands of students & alumni who carry the reputation of ITM on their shoulders.

ITM is at heart, an Entrepreneurial operation established as a result of the commitment to the Ideal that a private, non-aided business school could survive and thrive in the mostly regulated environment of education in India. In that venture, ITM has achieved the status of a pioneer among private business schools in India.

In the 20 years since its inception in 1991, the ITM Group of Institutes has earned the recognition of Academia and Industry. Recent national business school rankings have placed ITM among the Top 25 B-Schools in India. ITM Campuses in Bangalore, Chennai, Hyderabad, Mumbai, Navi Mumbai, Raipur & Warangal offer a range of master programmes in diverse fields such as International Business Information Technology, Retail Management, Human Resources, Financial Markets, Pharmaceutical Management, etc.

ITM Institute of Financial Markets started its first batch in 2004. The PGDM financial Markets program has taken years of development & collaboration in its creation. ITM is proud to be among ample of schools the world over & the very first in India to have the technology & academics required to offer this program.

ITM Institute of Financial Markets

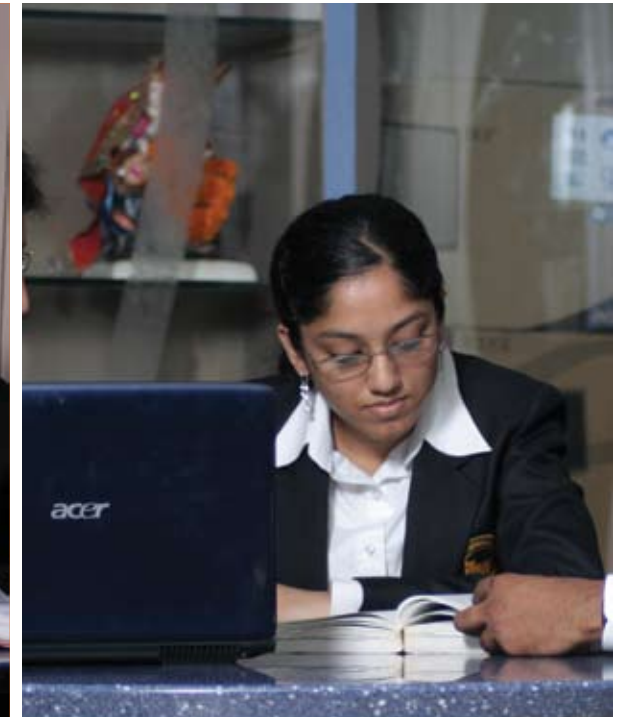

As the global environment of financial markets becomes more complex, the knowledge demand placed on professionals, operators, brokers, traders, employees of the banking or insurance industries, including compliance professionals - makes it imperative to know the products and markets and the mathematics that explain it. As new markets open up internationally, they must understand all of this from a complex global perspective.

ITM Institute of Financial Markets was established with this very purpose in mind: to train the next generation of Indian and International capital markets professionals and to provide access to the latest knowledge and tools in use globally.

The Institute offers a range of educational programs catering to the needs of fresh students as well as experienced professionals in the broad field of finance, Capital Markets, Insurance and Risk Management .

ITM IFM programs are conducted in our spacious, well-appointed classrooms and conference suites, fully equipped for modern pedagogical methods, at the ITM campus in Kharghar, Navi Mumbai, with extensive utilisation of our modern, Business Simulation Lab and training facility at Vashi, Navi Mumbai. The Business Simulation Lab is a part of the ITM Center of Excellence in Financial Markets, a dedicated Industry focused center at Vashi, Navi Mumbai.

Study at ITM-IFM

ITM IFM's mandate to provide specialized and advanced Financial markets education is evident in the academic infrastructure of the Institute. Starting with a dedicated finance and business library, full-text online archives provided by EBSCO, CMIE Prowess and the Harvard Business Review, students have unprecedented access to research and publications to support their classroom learnings.

Besides intensive classroom learning in specially designed classrooms with a full complement of A/V facilities, students are exposed to the real world culture and environment of financial markets operators.

The technology component of the programs at ITM-IFM is of special importance. A campus wide Wifi network offers seamless intranet and internet connectivity. ITM's Student Laptop Program ensures that all students are provided with laptop computers.

Dedicated Televisions and data displays stream current financial market news and analyses in our student lounges and laboratories. The most significant technological advantage however is the Business Simulation Lab, which provides real-world trading simulations. Read more on the Business Simulation Lab in the following pages.

Business Simulation Lab

What makes the Financial Markets program unique is the live Business Simulation Lab (Securities Dealing Room) that forms the center-piece of this program. This Business Simulation Lab gives our students the ability to hone their trading and analytical skills in a realistic market environment, using the very same software and tools that are in use at modern dealing rooms the world over.

Business Simulation Lab is the first of its kind in India, and the 6th in the world, for training Program Participants in a real-time, live market environment simulation. The Lab provides hands-on, real-world training in Securities, Derivatives, Commodities and Foreign Exchange Trading. This setup features actual exchange software from NSE.iT, live data feeds from Reuters and the Industry-standard in analysis and charting tools from Spider Software.

Technology Setup

Today's financial market participants are faced with the challenge of dealing with large volumes of real-time information and data from market conditions, industry & company news, and analyst updates to constantly changing market data. The Institute has recreated this information-rich environment, using the latest in computing and network technology.

Business Simulation Lab Features

- High-end dedicated data server, loaded with over 10 years of tick-by-tick market data, allowing for realistic simulations of historical markets
- Instructor workstation, with ability to supervise the trading activity, set risk & exposure parameters etc.
- High-speed dedicated Internet access through a wireless leased line, connected to all terminals through a closed LAN subnet.
- Wide-screen plasma and LCD t.v. screens to display market news and updates.

Software Setups

- XSTRADE: The Exchange administration Software platform of the National Stock Exchange (NSE), installed by NSE. iT, their technology subsidiary
- NEATix: The trading workstation software platform used by NSE traders
- Live data feeds of Equities, Derivatives, Futures and Options create real-time market conditions from Reuters and Spider Software.
- Online Technical Analysis and Charting: World standard software Installed by Spider Software (Pvt.) Ltd.
- Real-time news and analysis data streams from Reuters, and CRISIL Market Wire
- Live market news and updates via CNBC, Bloomberg TV etc.

PGDM Program in Financial Markets

PGDM: Financial Markets (AICTE Approved, full time) has been designed in collaboration with industry experts from Exchanges, Financial Institutions, other market participants and such market leaders as NSE.IT, Moneyline+Telerate and Spider Software keeping in mind the demand within the financial Markets for individuals having superior knowledge about Financial Markets than those coming out of the other regular Business schools. The Program will equip the students with a deep understanding of the markets.

The program provides an intellectual framework for understanding how financial markets are structured, regulated, and interconnected in this country and around the world. The program objective is to educate and train students in the operations of modern financial markets, with a focus on Equities, Derivatives, Forex & Commodities markets, in Indian and International Context.

We understand, too, that employers coming to campus are looking to hire for real world business opportunities and needs. We keep abreast of changes in the financial market place and update our curriculum Industry relevant accordingly through interaction with the Industry Experts, feedback from our graduates, the lessons learned from our professors on their various consulting engagements, our many opportunities to exchange ideas with market practitioners through our periodic meetings with the Advisory Board, comprised of senior executives from the Industry.

Other Certification attached to PGDM: Financial Markets.

- SII: Certificate in International Investment Management
- SII: Certificate in Derivatives

Conducted at ITM Institute of Financial Markets and certified by the Securities & Investment Institute (SII), UK.

The Securities & Investment Institute is the largest and most widely respected professional body for those who work or planning to work in the Securities and Investment industry in the UK and in a growing number of major financial centres round the world. Formed in 1992 by London Stock Exchange practitioners, SII now have more than 40,000 members in 89 countries.

Designed specifically for: Individuals wants to equip with the academic knowledge for a variety of roles in the investment industry and Derivative Markets like: Private

client asset management, Investment bankers working in asset management houses, Asset managers, Fund managers, Private Client stock brokers financial derivative and Commodity Markets etc.

- FPSB: Investment Planning (IP)
- FPSB: Retirement Planning and Employee Benefits (RPEB)

Certified Financial Planner Certification is a mark of excellence granted to individuals who meet the stringent standards of education, examination, experience and ethics. It is the most prestigious and internationally accepted Financial Planning qualification recognized and respected by the global financial community. Certification is the highest level of Certification worldwide in the field of Financial Planning.

The CFP Certification wins trust and presents opportunities worldwide. In this era of super specialization, the Professional

Certification – Certified Financial Planner (CFP) Certification, gears career aspirants for giving comprehensive financial advisory services to individuals and make a satisfying career in the financial services industry.

Benefits of the CFP Certification:

- You have met the global benchmark for competency, ethics & professional practice standards to provide comprehensive Financial Planning services.
- Enhanced career and employment opportunities with Financial Services companies. Your Services are sought by banks, distribution houses, AMC, Insurance Companies, Equity Broking and Financial Planning firms.

Associate PRM Certification Course

The Associate Professional Risk Manager Certification program offered by PRMIA (The Professional Risk Managers' International Association) enhances the risk management skills of our students in all disciplines. It covers the core concept of Risk Management, allowing non-specialists to interpret risk management information reports, make critical assessments & evaluate the implications and limitation of such results.
