

ITM Business School has various student clubs under the flagship of UTKARSH Committee. These are talent-based clubs, need based committees, clubs around the study topics and some around student interests. There are clubs that work on environmental, economic and social issues too.

Students are free to join any clubs of their interest as most clubs are run by students with the guidance from the faculties and sometimes the alumni.

The Clubs, Forums & Cells enhance the campus or college experience for students

Student clubs help students to build connections, network with corporates, learn about a topic or sector and develop leadership skills.

Student-led clubs and activities give students the prospect to become better informed and engaged in issues and possible career paths. Several clubs focus on the link between business and environment or incorporate environmental content into their contributions, which include workshops, speaker series, career panels and skill development workshops, and networking events.

Below mentioned are the Departmental and the General Clubs:
